Education

University of Victoria *Sept 2026 – Aug 2028(expected)*
Master of Applied Science (MASc) in Electrical and Computer Engineering *Victoria, BC*

- *Ongoing Coursework:* ECE 503 – Optimization for Machine Learning; ECE 515 – Information Theory

Jahangirnagar University *February 2018 – March 2023*
Bachelor of Science in Information Technology *Dhaka, Bangladesh*

- Government Merit Scholarship for academic excellence, awarded all four undergraduate years

Technical Skills

Languages:	JavaScript, TypeScript, Python, C++, SQL, VHDL
Frameworks & Tools:	React.js, Next.js, REST APIs, Cypress, Git, GitHub
Machine Learning:	Deep learning, federated learning, medical data (MRI, EEG)
Digital Design:	Combinational and sequential logic, FPGA programming
Databases:	MySQL

Professional Experience

Laboratory Instructor – Digital Design (ECE 241) Sept 2026 – Present
University of Victoria Victoria, BC

- Lead two weekly labs for 18 undergraduates on sequential and combinational logic, FPGAs, and VHDL.
- Guide students through hardware and simulation exercises, debugging circuits and design errors one-on-one.
- Explain technical concepts clearly to students with different levels of background knowledge.

Software Engineer Mar 2024 – Nov 2024
Intercloud Limited Dhaka, Bangladesh

- Developed responsive web applications using React.js, Next.js, JavaScript, and TypeScript, integrating frontend interfaces with backend REST APIs.
- Contributed to the Brilliant Cloud Portal, a production platform for managing user access, cloud services, and administrative operations (bcp.brilliant.com.bd).

Retail and Fulfillment Associate Jan 2025 – Present
Best Buy (2026 – Present), Walmart (2025 – 2026), Value Village (2025) Victoria, BC

- Fulfilled around 400 online and in-store orders daily at Walmart using digital inventory and order systems.
- Selected as Walmart Shining Star of the Month (March 2026), chosen from about 500 store associates.

Projects

– **SEAsk** *(Ocean Hackathon Victoria, October 2026)* – Team prototype turning live ferry ocean-sensor data into a passenger kiosk and crew dashboard for BC Ferries. Wrote the project description and built the pitch deck.
– **Door-to-Door Service Request System** – Designed a relational database based web application for a utility services business to manage service requests by area.
– **CS-Wiki** – Built a web platform that streamlines computer science research by organizing academic resources.

Volunteering and Leadership

– **Technology Support Volunteer** – Oak Bay Volunteer Services Nov 2025 – Present
Help community members, mostly seniors, solve everyday tech problems in plain language.
– **Vice-Chair** – IEEE Computer Society, Jahangirnagar University 2022
